

MUHAMMAD ASNAWI BIN HASHIM

Full-Stack Developer · PHP / Laravel

Kajang, Selangor · 011-2341 0520 · asnawihashim30@gmail.com

PROFESSIONAL SUMMARY

Full-stack developer with **4+ years** building and maintaining high-performance **PHP/Laravel** web applications for government and enterprise clients. Strong in **system integration (REST/SOAP)**, database design and migration, and **Linux server operations**, with recent hands-on focus on **AI-assisted development** and code-quality governance. Comfortable owning features end-to-end — from requirements and architecture through deployment, testing, and production support — while mentoring peers and driving engineering standards.

TECHNICAL SKILLS

Languages: PHP, JavaScript, Java, C++, SQL

Frameworks & Libraries: Laravel, Livewire, CodeIgniter, Yii, Spring Boot, Vue.js, jQuery, Bootstrap, Node.js, Flutter

Databases: MySQL, MariaDB, PostgreSQL, Oracle, MongoDB

APIs & Integration: REST, SOAP, Eloquent ORM, system integration, data migration

DevOps & Servers: Git (GitHub/GitLab/Bitbucket), Docker, CI/CD, Nginx, Apache, Linux (Ubuntu/CentOS), Windows Server

Practices: OOP, MVC, RBMS, Agile/Scrum, unit/integration/performance testing, code review

Tools: VS Code, PhpStorm, IntelliJ, Cursor, Postman, SoapUI, MobaXterm, PuTTY, MySQL Workbench, Navicat, TOAD, JasperReports

WORK EXPERIENCE

The Makeover Guys — Full-Stack Developer / Digital Product Engineer

Jan 2026 – Present

- Build and maintain high-performance PHP/Laravel applications with a focus on modular, clean, maintainable architecture.
- Drive **AI-assisted development** to accelerate delivery, and govern AI-generated code through review for quality, security, and architectural integrity.
- Established shared prompt libraries and coding standards that improved consistency and development velocity across the team.
- Lead peer code reviews and build automated unit, integration, and performance test suites.
- Own deployments, dependency and API upkeep, and production monitoring to keep the platform stable and secure.

Two Q Alliance Sdn Bhd (2QA) — Software Developer

Mar 2025 – Dec 2025

- Designed, developed, and maintained PHP applications across the full SDLC — from requirements gathering to deployment and support.
- Delivered features on Agile sprints, collaborating with product managers, designers, and engineers to refine requirements.
- Conducted code reviews and mentored junior developers; implemented unit, integration, and performance tests.
- Handled data migration, database seeding, and backend data changes; resolved production and non-production defects with debugging and logging.
- Managed server deployments and performance monitoring, and led client meetings, requirement analysis, and system testing.

Object Expression Sdn Bhd (OESB) — Software Engineer

Dec 2021 – Nov 2024

- Developed new modules and change requests, enhancing existing systems and resolving user issues through system-flow and code analysis.
- Built and maintained REST/SOAP integrations between government and enterprise systems.
- Administered databases (querying, backup, restoration, configuration) and Linux servers (monitoring, services, deployments).
- Led client meetings, requirement analysis, and system testing; documented server reports and preventive maintenance.

SELECTED PROJECTS

PSOH — Developer & Technical Lead · Laravel Livewire, MySQL, REST, Nginx

KPM Portal — Developer & Technical Lead · Laravel, MySQL, Nginx

HIMS — Developer · Laravel, Vue.js, REST/SOAP, MySQL, Nginx

OSC 3.0 Plus Online — Developer · Laravel, REST, MySQL, Nginx/Apache

MyeTaPP — Developer · *Java (LeBAH), Oracle, SOAP, Apache Tomcat*
e-SPANP 2.0 · SISPAK · MyAssessment · ESSDL — Developer · *PHP/Laravel, MySQL/MariaDB, REST, Linux*
Garage · The Makeover Webpage — Developer · *CodeIgniter, MySQL, Bootstrap*

EDUCATION

B.Sc. Computer Science (Software Development), Honours	— Universiti Teknikal Malaysia Melaka (UTeM)	2018 – 2022
Foundation in Science (Modul Sains 3)	— Kolej Matrikulasi Perak, Gopeng	2017 – 2018
